

Hiring Manager,
Capgemini

Greetings,

My name is Vivek Kisan Dumbre, a Data Scientist with demonstrated skills for **Data analysis** with a proven track record of analytical acumen and creative problem solving. Thus, it's with great interest I'm applying for the Jr. Data Scientist role at Capgemini.

Armed with prolific knowledge in **data modelling** and **visualization**, and well-honed skills of **SQL**, **Python programming**, **Excel**, **Power Bi**, **Tableau**, **Git** and etc. I'm certified from Boston Institute of Analytics and IIIT – Bangalore in complex data handling and predictive analytics using ML techniques. I strongly believe that my technical skills together with my educational qualification would make me an apt candidate for the role.

Additionally, I hold 3 years of experience in **stakeholder management**, **cross functional team collaboration**, **IT -service delivery and management** through my various job roles in past organizations showcasing my abilities to **lead teams**, **story telling** and successfully executing various project. Using all the above skills and putting them to a test I have also executed multiple Data analysis and Machine Learning case studies successfully which can be accessed from github.com/Vex-SaffronCodes and are also mentioned in my resume in detail.

I would appreciate the opportunity to further discuss my suitability and qualifications fitment for the role with you on call or in person.

Thank You

Warm regards,
Vivek Kisan Dumbre
